

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV expedition. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

Whilst on their trip, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered an infinite market for a product that could swiftly and safely lift individuals in the air to accomplish upkeep and other construction functions.

After returning from their trip, John set up a business with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design elements of that original lift into existing designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into a range of markets worldwide and develops new products to ensure consumers are capable of being more efficient and perform in the workplace within a safer environment.
